

# Call for Workshops

co-located with ACM CoNEXT 2019

ACM CoNEXT 2019, to be held in Orlando in Florida, is soliciting proposals for one-day workshops to be co-located with the main conference. The workshops are considered an integral part of the conference and will be fully incorporated into its logistical and budget planning process. Workshops are not required to bring their own sponsorship but other possibilities will be studied in a case by case basis. Workshop papers will be published in the same set of proceedings as the conference, and will be available on the ACM Digital Library. The workshops should be on original and timely topics of relevance to the [CoNEXT community](#), and aimed at fostering lively discussions and technical exchanges among participants.

Workshop proposals sent in response to this open call should include the following material:

- A brief statement of interest including a description and rationale for the workshop topic and its relevance to the CoNEXT community, as well as a comparison with existing workshops on related topics, if applicable.
- A draft call for papers, including names and affiliations of workshop chairs and a tentative list of TPC members (as complete as possible).
- The workshop deadlines, both internal and external. See below for guidelines on important external guidelines.
- An expected number of submissions, accepted papers, and attendees (if known).
- A description of any past instances of the proposed workshop, including number of submissions, accepted papers, and attendees.
- A list of people whom you have solicited (or plan to solicit) to participate at the workshop. If the workshop is interdisciplinary, please provide details about your plans to advertise to other communities and how you intend to encourage participation at the workshop.

The workshop organizers should also take into account the following practical considerations:

- The room capacity is approximately 20-30 with classroom arrangement, and twice this number with auditorium arrangement.
- All of the Workshops for ACM CoNEXT 2019 should have the same deadlines (submission deadline, camera-ready date), to facilitate coordination with other aspects of the conference organization. Deadline extensions should be coordinated with the Workshop Co-chairs and if needed, the Publications Chair.
- A/V (projector and screen) will be provided in all workshop rooms, which may also be equipped with microphone and speakers.
- There will be Wi-Fi coverage in all areas of the conference, including the workshop rooms. Any specific networking requirements should be stated in the proposal.
- Individual Workshop organizers will be expected to be responsible for managing their workshop and coordination with the local arrangements chair of CoNEXT 2019 for facilities, and with publications chairs for camera ready papers.
- Individual Workshop organizers will be responsible for setting up the paper submission site and review process for the selected workshops and their individual web page design in coordination with the CoNEXT 2019 web chair.

If you have questions about your workshop proposal, do not hesitate to contact the workshop chairs.

Proposals should be submitted as ASCII text or PDF files only, via email to: [conext19ws@gmail.com](mailto:conext19ws@gmail.com). The workshop selection will be made by the workshop chairs in consultation with the general chairs and the steering committee.

Please submit the workflow proposal by June 20th, 2019. If you would like to invite keynote speakers, you are welcome to do so. The speakers will receive complimentary registration for the workshop and conference. There is no accommodation for other expense.

Here are some tentative dates for workshops:

Initial Workshop CFP out: July 3, 2019

Submission: September 16, 2019

Notification: October 4, 2019

Camera-ready: October 13, 2019

Workshop date: Dec. 9-12
